The secrets that Kosuke Anamizu has buried on Hidden Tape No. 66 are deeply telling. Unearthing these ten artifacts, we understand that they are meant for someone else. Vast and inward, the tracks are lovingly assembled from detailed field recordings, guitars, and electronics. Soundscapes flowing through a filter of longing and mystery: This is essential listening for Fans of Hammock, Sigur Ros, and Fennesz. (NOTE- CD package includes a QR code for an additional hidden track.)

#### ABOUT THE ARTIST

Making his home in the shadow of Mt. Fuji, Kosuke Anamizu's ethic stems from a belief that music and nature are fundamentally coupled. Driven by great expanse, his goal is to impart the warmth of life to the wide, barren landscapes of our inner worlds. Kosuke's doppelganger is one part of The Potone!, an electronica band on the Neguse Group label.
